

Horrifying vegetarians for over 100 years

Did you ever notice, like we have, that most everyone in our little village of Marblehead is quite a bit more intelligent than average? We've also made the totally unbiased observation that, for the most part, we tend to be much better looking. Many here will tell you that this phenomenon is due to our special water. You see, our Village operates its own water plant. Well, we can tell you now, that after extensive research, it's NOT the water. While not discounting the amazing properties of this special water, the evidence we've compiled points to an entirely overlooked reason.

IT'S THE MUTACH'S MEAT!

That's right! A consensus of local independently verified opinion is that regular consumption of Mutach's steaks, chops, fish and of course our spirits and wine makes one much more intelligent and better looking than the average Ottawa, or Erie County resident! Now, we've noticed too, that we have some employees who do not reside in Marblehead. These employees (by and large) are not stupid and are very good looking! This of course means that Village residency is not required to have these attributes. I've asked, and these sharp, attractive employees agree, IT MUST BE THE MUTACH'S MEAT!

So, that, in a nutshell, is obviously why our employees, our customers, and Marbleheaders in general are so good looking and smart!! Can that really be said of those who buy their meats at the big stores? No offence, but, without elaborating, we all know that's not the case.

Concluding, If you want to be smart and good looking, or if you want to stay that way, shop at Mutach's for great meat, spirits wine and beer. We can't help you if you don't.

Free delivery entire month of Feb. \$50 min please.

Mutach's of Marblehead since 1907
